PROFESSIONAL SUMMARY

Software engineer with hands-on platform and reliability experience—deploying and operating containerized microservices on Kubernetes, building observability with Grafana and Prometheus, and automating infrastructure with Terraform and Ansible through Jenkins and ArgoCD CI/CD pipelines. Prior contributor to UIDAI's Aadhaar verification systems; experienced with on-call, root-cause analysis, and post-incident reviews to keep high-traffic, mission-critical services reliable. Strong CS fundamentals and AWS certified.

TECHNICAL SKILLS

Containers & IaC	Docker, Kubernetes, Terraform, Ansible
CI/CD & GitOps	Jenkins, ArgoCD, Git, Maven
Observability & Reliability	Grafana, Prometheus, Alerting, On-call, RCA / PIR, Incident Response
Cloud & OS	AWS (Cloud Practitioner), Linux
Languages	Java, Python, JavaScript, TypeScript, SQL, Bash
Backend & Databases	Spring Boot, REST APIs, Microservices, Node.js, MySQL, MongoDB
Core CS	Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

PROFESSIONAL EXPERIENCE

Software Engineer – Backend

Aug 2026 – Present

Paytm Payment Services Limited, Noida

- Develop and operate backend services for tracking and inventory inspection systems using Java and Spring Boot, deploying containerized microservices on Kubernetes with a focus on reliability and scalability.
- Monitor service availability and latency through Grafana dashboards and Prometheus alerts, and participate in on-call, root-cause analysis (RCA), and post-incident reviews (PIR) to sustain production reliability.

Tech Dev – Backend Intern

Mar 2026 – Jul 2026

Paytm Payment Services Limited, Noida

- Built scalable backend microservices and REST APIs for high-traffic payment services using Java 21, Spring Boot, Maven, and SQL, strengthening reliability and maintainability across core workflows.
- Containerized and deployed services to Kubernetes through Jenkins and ArgoCD CI/CD pipelines, streamlining releases and accelerating production issue resolution.
- Automated infrastructure provisioning and configuration using Terraform and Ansible, improving environment consistency and repeatability.

SDE Intern

Jun 2025 – Oct 2025

Unique Identification Authority of India (UIDAI), New Delhi

- Developed an in-house Aadhaar Verification Portal and Aadhaar Feedback Mechanism for kiosk centres, building Node.js REST APIs to improve scalability and security of a government-scale identity verification system.
- Optimized backend performance through database tuning, caching strategies, and connection pooling, reducing API latency and increasing verification throughput.
- Strengthened authentication mechanisms to improve security and data integrity across verification workflows.

PROJECTS

Aadhaar Verification Portal & Feedback Mechanism — Built an in-house Aadhaar Verification Portal and Feedback Mechanism for UIDAI kiosk centres, engineering backend services and REST APIs with a focus on scalability, secure data handling, and high-throughput processing for a government-scale, reliability-critical system.

BizBharat-Bot — Built an AI-powered chatbot using RAG with document-retrieval pipelines and API-driven services for automated business support, applying backend service design and API integration.

Multi-Agent AI System — Built a multi-agent system using RAG and LLMs that collaborate to plan, execute, and optimize complex workflows, applying distributed orchestration and automation of multi-service pipelines.

EDUCATION

SRM Institute of Science and Technology, Kattankulathur, Chennai

2022 – 2026

B.Tech in Computer Science | CGPA: 8.55 / 10

CERTIFICATIONS

AWS Cloud Practitioner Essentials, Amazon Web Services

Sep 2026

SkillsBuild AI NextGen 2026, IBM

Mar 2026

Introduction to Generative AI, Duke University

May 2025

Data Science, Infosys Springboard

Apr 2025
